EDUCATION

University of Texas at Dallas

Bachelor of Science in Computer Science, Minor in Business Administration

Richardson, TX

Expected May 2027

EXPERIENCE

Web Content Assistant

Nov. 2025 – Present

Naveen Jindal School of Management (JSOM)

Richardson, TX

- Increased organic traffic 15% by restructuring site metadata, internal linking, and accessibility (WCAG) compliance.
- Drove 70% traffic growth by optimizing site architecture and improving user navigation pathways.
- Analyzed user engagement metrics with Silktide to identify drop-off points and guide content improvements.

ACM UTD Officer - Community (Archives) division

Jun. 2025 – Present

Association for Computing Machinery (ACM)

Richardson, TX

- Curated and maintained 500+ digital assets, improving discoverability and archival accuracy for publication use.
- Reduced content review cycles 20% by standardizing workflows across a 10-person editorial team.
- Implemented structured tagging and indexing system to streamline asset retrieval for future publications.

Development Coordinator

Jun. 2025 – Present

Women in Engineering Hackathon (WeHack)

Richardson, TX

- Built and deployed a React-based event platform supporting 600+ concurrent users with optimized asset delivery.
- Integrated sponsor assets into the site pipeline, ensuring consistent branding and on-time launch delivery.
- Collaborated with cross-functional teams to align development timelines with marketing and event operations.

Software Engineering Intern

Sept. 2024 – Dec. 2024

Predica Inc.

Dallas, TX

- Reduced frontend build times 40% by migrating to Vite and optimizing module bundling in a React application.
- Developed 15+ reusable UI components with Tailwind CSS, improving responsiveness and cross-browser consistency.
- Integrated RESTful APIs to enable dynamic data rendering and improve overall application interactivity.

PROJECTS

BuildYourRide – 3D Vehicle Customizer | *Nuxt.js, MongoDB, TresJS, Blender, Figma*

Nov. 2025

- Developed a 3D vehicle configurator using 50+ real-world models for accurate customization workflows.
- Achieved consistent 60 FPS rendering by optimizing 3D assets and reducing draw calls in TresJS.
- Designed an intuitive UI in Figma and implemented it in Nuxt.js to enhance user interaction and usability.

NexusMath – Multi-threaded Networking Suite | *Java, Multi-threading, Socket Programming*

Mar. 2026

- Built a multi-threaded Java server handling concurrent client requests via a custom socket protocol.
- Implemented a thread-safe task queue to process parallel workloads reliably across multiple clients.
- Optimized request handling latency by managing thread pools and minimizing blocking operations.

UTDDash – Full-Stack Delivery Platform | *FastAPI, PostgreSQL, React*

Apr. 2026

- Developed a FastAPI + PostgreSQL backend enabling real-time order processing and secure delivery tracking.
- Designed a QR-based verification system to ensure authenticated delivery handoffs between users.
- Built RESTful APIs to handle order creation, tracking, and status updates between frontend and backend systems.

K-Means Jaccard HealthCluster | *Python, Pandas, Matplotlib*

Apr. 2026

- Clustered high-volume health tweets using K-means to improve information retrieval efficiency.
- Applied Jaccard similarity to transform raw text into meaningful thematic clusters.
- Visualized clustering results with Matplotlib to identify trends and validate model performance.

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript, Java, SQL, R

Frameworks & Tools: React, Nuxt.js, Node.js, FastAPI, Vite, Tailwind CSS, Figma, Blender, Excel

Data & ML: Pandas, Scikit-learn, XGBoost, Tableau, Matplotlib, K-Means Clustering

Developer Tools: Git, MongoDB, PostgreSQL, Socket Programming, Multi-threaded Systems

HONORS AND AWARDS

Best Domain Name from GoDaddy Registry [MLH]: WEHack 2024, Major League Hacking, UTD - Apr 2024
