Dallas, Texas, United States

EDUCATION

• University of Texas at Dallas

present - May 2027

Bachelor of Science - BS, Computer Science, Minor - Business Administration

Richardson, USA

- Relevant Coursework: Advanced Data Structures & Algorithmic analysis, Computer Architecture, Systems Programming in UNIX, Discrete Math, Programming Fundamentals, IT for Business, and Financial Accounting.

EXPERIENCE

◦

Predica Inc.

Fall 2024

Role - Software Engineering Intern

Dallas, USA

- * Hands on experience with scalable cloud solutions, Software design, development, testing, deployment in public cloud.
- * Designed and developed a resume enrichment platform on a time crunch using React, Vite's HMR, and Tailwind CSS, creating sleek and responsive user interfaces with increased development speed.
- * Integrated OpenAI API to improve platform functionality, streamline resume customization, and enhance user experience.

Ladies in Tech Mentoring Program (LITMP)

June 2025 – Present

Role - Treasurer

Richardson, USA

- * Manage a budget of \$5,000+ to support mentoring events and initiatives, ensuring accurate financial tracking and transparent reporting.
- * Built Excel-based financial models to monitor 100% of expenses, reducing manual reporting time by 50%.
- * Collaborate with 10+ executive members to align financial planning with organizational goals and event strategies.

Association for Computing Machinery (ACM)

June 2025 - Present

Role - ACM Archives Officer

Richardson, USA

- * Actively contribute to the design and content **development of the Fall 2025 ACM physical magazine**.
- * Responsible for curating and providing key historical content and visuals from the ACM archives to enrich the magazine's articles and features.
- * Collaborate directly with the magazine's editorial and design teams to ensure accurate **representation of ACM's legacy and current initiatives**.
- * Oversee the organization and cataloging of physical archival materials, ensuring they are readily accessible for current and future publication needs.

Women in Engineering Hackathon (WeHack)

June 2025 - Present

Role - Development Coordinator

Richardson, USA

- * **Actively contributed to the architectural design and development of the official WeHack 2026 website**, serving as the central platform for event information and participant engagement.
- * **Proactively collaborated** with the WeHack organizing committee to translate event vision into technical specifications, working seamlessly within the development team.
- * **Ensured a cohesive and professional brand identity** across all digital and print media by working in tandem with fellow club members.

UTDesign: Quantitative Research in Engineering Education

Fall 2024, Spring 2025

Role - Undergraduate researcher

Richardson, USA

- * Investigated factors shaping undergraduate students' engineering identity through surveys and concept maps, focusing on interest, competence, recognition, and initiative to enhance curriculum design and improve retention.
- * Supervised and interacted with more than 570 students, transcribing and analyzing their concept maps using advanced tools to quantify engineering perceptions and identity dynamics across diverse demographics.

- * Proposed to contribute to predictive modeling using Artificial Neural Networks (ANN) to correlate identity data with concept maps, enabling actionable recommendations for educators to support student success and growth in engineering education.

Women Who Compute (WWC)

January 2025 - Present

Role - UX designer

Richardson, USA

- * **Designed visually appealing promotional materials** and event graphics using Figma to **increase awareness and participation in club events**.
- * Collaborated with club members to maintain a consistent brand identity across digital and print media.
- * Participated in workshops and events focused on **empowering women in technology** and fostering a supportive community.

PROJECTS

- * **EnchanTobor - WEHack** April 2024
 - Tools: **HTML, CSS, JavaScript, R**
 - Developed a website to **streamline the onboarding process** for university freshmen, improving user engagement by creating a dynamic and interactive interface.
 - Implemented **Parallax Scrolling** for an illusion of depth and perspective.
- * **Best Domain Name from GoDaddy Registry [MLH] - WEHack 2024** [Link to Project](#) September 2024
- * **2048 Game (Customized Version)**
 - Tools: **Python**
 - Gained deeper understanding of class usage and object-oriented programming in Python.
 - Explored logic and design patterns for building custom grid-based games.
- * **Enhanced problem solving skills through algorithm optimization for game mechanics.** [Link to Project](#) April 2021 - present
- * **Imparting STEM education**
 - **Directly mentored over 100 sixth-grade students** in STEM through weekend coaching, fostering curiosity and success in competitive exams.
 - Designed and implemented a **"train-the-trainer" model** to ensure program sustainability and adapt to online teaching during lockdown. [Link to Project](#)
- * **Sakhi Let's Play - Promoting participation of Women in sports** April 2021 - present
 - **Led an initiative to promote sports participation for girls aged 13-18**, conducting surveys and organizing awareness campaigns.
 - **Influenced municipal authorities and public representatives** to take action, improving access to sports opportunities by addressing identified barriers. [Link to Project](#)
- * **Social Media and Device Deaddiction (SMD2P)** April 2021 - present
 - **Created and analyzed surveys on social media usage and behavioral changes**, using insights to deliver educational presentations in schools.
 - **Promoted healthier habits and raised awareness** about device addiction's impact, advocating for solutions like usage trackers and outdoor activities.

SKILLS

- **Programming Languages:** C++, C, Python, JavaScript, HTML, CSS
- **Frameworks & Tools:** React.js, Node.js, Tailwind CSS, Vite, Figma, Microsoft Azure, Microsoft Tableau, Microsoft Excel
- **Database Systems** **Version Control:** Mongo DB, GitHub
- **Soft Skills:** Public speaking, Collaboration, Problem Solving, Critical thinking, time management

HONORS AND AWARDS

- * Best Domain Name from **GoDaddy Registry [MLH] - WEHack 2024: Major League Hacking, UTD - April 2024**

CERTIFICATIONS

- * **Intro to Web Development** Summer 2025
- * Certifying Body: Codepath, Certificate ID: 314834
- * **Intermediate Technical Interview Prep** Summer 2025
- * Certifying Body: Codepath, Certificate ID: 125990
- * **ECS Cubed Professional Development Program - Intermediate Level** October 2023
- * Certifying Body: UTD
- * **Android App Design** July 2023
- * Certifying Body: UTD
